SUMMARY

Cybersecurity-focused Computer Science graduate with hands-on experience in SOC operations, threat monitoring, vulnerability assessment, and incident response. Proven ability to integrate artificial intelligence with network defense by engineering a custom hybrid Intrusion Detection System (IDS). Proficient in Wazuh, Wireshark, Nmap, Burp Suite, and Autopsy. Skilled in developing responsive frontend interfaces for security dashboards and analyzing system telemetry to identify anomalous behavior.

PROFESSIONAL EXPERIENCE

Cybersecurity Intern

07/2025 – 09/2025

Techaccess Pakistan

- Reinforced SOC operations for a team of 8 analysts, focusing on real-time network defence and proactive threat monitoring across a multi-client environment.
- Triaged 50+ daily security alerts in Wazuh SIEM, maintaining a sub-2-hour escalation time for validated incidents and reducing analyst backlog by 15%.
- Conducted vulnerability assessments across 10+ systems using Nmap and Burp Suite, producing structured remediation reports adopted directly into client security roadmaps.
- Analysed network and system logs using Wireshark, Wazuh and Autopsy, contributing to 3 incident post-mortems and improving detection rule coverage by 20%.

PROJECTS

CyberSentinel (FYP)

2026

Tech: Wazuh, Isolation Forest, Random Forest, React.js, JavaScript, CSS, HTML, Python, MongoDB.

- Engineered a hybrid AI-based IDS achieving 94%+ detection accuracy using Random Forest (signature-based classification) and Isolation Forest (anomaly detection) with false positive rate upto 7% only.
- Architected a React.js dashboard consuming Python (FastAPI) REST APIs, rendering live model predictions and system telemetry for alert streams.
- Deployed Wazuh for centralised log collection, ingesting 10,000+ events/day and routing parsed alerts into the ML pipeline for automated classification.
- Built 2 interactive Highcharts visualisations (Spline Chart and Donut Chart) enabling drill-down analysis of attack trends and attack type distribution over time.

Password Cracker Tool

2025

Tech: React.js, JavaScript, CSS, HTML, Node.js, MySQL

- Built the responsive UI and integrated validation logic for a password security auditing tool supporting MD5, SHA-1, and SHA-256 hash cracking via brute-force and dictionary-attack simulations.
- Tested against a 10,000-entry wordlist with sub-500ms average crack time for weak passwords.

ChatBot

2025

Tech: Ollama (smollm:1.7b), JavaScript, CSS, HTML, Node.js

- Developed a responsive web chat interface to interact with a local Ollama (smollm:1.7b) model, enabling fast, on-device conversational generation.
- Engineered the frontend-to-backend API flow using JavaScript to handle asynchronous requests and smoothly deliver model responses to the local browser environment.

FitnessFreak

2024

Tech: React.js, JavaScript, CSS, HTML, Node.js, MySQL

- Developed the frontend interface and interactive client dashboards for a fitness platform offering personalised workout plans, nutrition tracking, and progress analytics for 3 user roles (dietitian, trainer, member)
- Reduced form-submission errors by 40% through input validation refactoring.

Line Follower Robot

2024

Tech: Arduino Uno, IR Sensors, DC Motors, Embedded C/C++

- Built an autonomous line following robot using IR sensors to track a black line on a white surface.
- Programmed Arduino-based motor control with sensor-driven logic for path correction and stable movement.

TECHNICAL SKILLS

Cybersecurity & Tools

Vulnerability Assessment, Penetration Testing, Anomaly Detection, Threat Intelligence, Incident Response, Log Analysis, SIEM Monitoring, SOC Operations, IDS, Kali Linux, Ubuntu, Nmap, Wireshark, Wazuh, Burp Suite, Autopsy, SQLMap, Metasploit.

Web Development

React.js, JavaScript, CSS, HTML, Responsive Design, Highcharts, Ant Design, Figma, Git, GitHub, Version Control, Render, Postman, Docker.

AI & ML

Machine Learning, NumPy, Scikit-learn, Isolation Forest, Random Forest, Data Preprocessing, Model Training & Evaluation, Feature Engineering.

EDUCATION

Bachelor of Science in Computer Science

09/2022 – 07/2026 | Islamabad, Pakistan

Capital University of Science & Technology

CGPA - 3.4/4.0

Relevant Coursework

Introduction to Programming, Object-Oriented Programming, Data Structures and Algorithms, Databases, Software Engineering, Networking, Information Security and Forensics, Computer Forensics, Cybersecurity, Data Science, AI, Cloud Computing.

CERTIFICATIONS & AWARDS

Google Cybersecurity

Coursera

2026

SOC Foundation Training

Microsoft

2025

ExclTe Cup

CUST

2025

Robo CUST

CUST

2025

2nd Position: FYP Research & Poster Design (CyberSentinel)

ICCOR

2026
