SUMMARY

AI/ML-focused Computer Science graduate with hands-on experience building anomaly-detection models, evaluating classifiers, and deploying local LLM-powered applications. Engineered CyberSentinel, a hybrid AI-based Intrusion Detection System combining supervised and unsupervised learning for real-time security telemetry analysis, and built a Hybrid Vector + Graph RAG system on Neo4j with LLM-driven knowledge graph construction. Proficient in Python, Pandas, NumPy, Scikit-learn, LangChain, Neo4j, FastAPI, MongoDB, Docker, and Git/GitHub, with practical experience in model evaluation, feature engineering, and data preprocessing.

PROFESSIONAL EXPERIENCE

AI/ML Intern, Zaytrics 08/2026 – Present

- Contributing to AI/ML projects using Neo4j, Cypher, and LLM-driven knowledge graph construction, applying hands-on RAG and graph-database techniques in a team environment.

Cybersecurity Intern, Techaccess Pakistan 07/2025 – 09/2025

- Reinforced SOC operations for a team of 8 analysts, triaging 50+ daily Wazuh SIEM alerts across a multi-client environment, maintaining a sub-2-hour escalation time and reducing analyst backlog by 15%.
- Conducted vulnerability assessments across 10+ systems using Nmap and Burp Suite, and analyzed logs via Wireshark, Wazuh, and Autopsy, contributing to 3 incident post-mortems and a 20% gain in detection-rule coverage.

PROJECTS

Hybrid-Vector-Graph-RAG 2026

Tech: Neo4j, LangChain, Google Gemini, Python

- Built a hybrid Vector + Graph RAG pipeline on Neo4j, using Gemini embeddings and LLM-driven extraction to turn a 7-book corpus into a knowledge graph of 1,800+ entities and 130+ relationship types.
- Engineered source-grounded verification and a hybrid answer-synthesis layer combining vector and graph retrieval, designed to generalize to any text corpus.

JARVIS 2026

Tech: Python, Typer CLI, Ollama, Local LLMs, YAML/JSON, uv/uvx, MCP-ready architecture, Git/GitHub

- Built a local AI assistant with a Python CLI (Typer) and Ollama-backed local LLM execution, using a modular YAML/JSON-configured, MCP-ready architecture for fully offline, private conversational AI.

CyberSentinel (FYP) 2026

Tech: Wazuh, Isolation Forest, Random Forest, React.js, JavaScript, CSS, HTML, Python, MongoDB.

- Engineered a hybrid AI-based IDS, achieving 94%+ detection accuracy using Random Forest for signature-based classification and Isolation Forest for anomaly detection with just 7% false positive rate.
- Built a React.js dashboard consuming Python/FastAPI REST APIs, routing 10,000+ daily Wazuh events into the ML pipeline and visualizing live predictions, alert trends, and attack-type distribution with Highcharts.

ChatBot 2025

Tech: Ollama (smollm:1.7b), JavaScript, CSS, HTML, Node.js

- Developed a responsive web chat interface for a local Ollama smollm:1.7b model and engineered the JavaScript/Node.js API flow for browser-based responses.

TECHNICAL SKILLS

Python, Pandas, NumPy, Scikit-learn, Random Forest, Isolation Forest, Model Evaluation, Feature Engineering, Data Preprocessing, Neo4j, LangChain, Retrieval-Augmented Generation (RAG), Knowledge Graphs, Cypher, Google Gemini API, Ollama, Local LLMs, Prompt Engineering, PyTorch, TensorFlow, Hugging Face, FastAPI, MongoDB, React.js, JavaScript, Docker, Git/GitHub, Wazuh, Wireshark, Nmap, Burp Suite.

EDUCATION

Bachelor of Science in Computer Science 09/2022 – 07/2026 | Islamabad, Pakistan

Capital University of Science & Technology | CGPA - 3.4/4.0

CERTIFICATIONS & AWARDS

Google Cybersecurity, Coursera 2026

2nd Position: FYP Research & Poster Design (CyberSentinel), ICCOR 2026

Neo4j Fundamentals, Neo4j GraphAcademy 2026

Building Knowledge Graphs with LLMs, Neo4j GraphAcademy 2026
